

Software Development Services

C Speed has a robust and versatile software engineering team built to design and implement custom solutions. With experts on everything from embedded firmware and device drivers to desktop, mobile & web applications, cloud computing and connectivity, we have the skill sets necessary to build the software that **makes your product come alive.**

SOFTWARE CAPABILITIES

- ✦ Application Software
- ✦ Embedded Software
- ✦ Graphical User Interfaces
- ✦ Communication Interfaces
- ✦ Device Drivers, Code Signing, WHQL Certification
- ✦ Microcontroller Firmware
- ✦ GPU Computing
- ✦ Digital Signal Processing
- ✦ Real-time Data Processing
- ✦ High-Speed Visualization & Review

ENVIRONMENTS & PLATFORMS

- ✦ Windows
- ✦ Linux/Unix
- ✦ Real-time Embedded Systems
- ✦ QNX, ThreadX
- ✦ Mobile & Web Applications
- ✦ Cloud, Enterprise & Distributed Computing
- ✦ USB, BT/BLE, RS232, SPI, I2C, 1394, CAN, LIN, FlexRay
- ✦ CUDA
